

FLEXFOLD 340

Modular Folding System

The new FlexFold 340 folding system series consists of several modular individual machines that can be flexibly linked together.

This allows the corresponding machine configuration to be configured quickly and economically by a certain folding product. In addition to concrete folding product solutions, the concept also makes universal configurations possible, which allows a large number of folding products. And this with short set-up times and economical run times even with small to medium runs also online.

- robust, solid and low-maintenance, made for permanent use
- modular and in various versions combinable
- paper size up to DinA3+ (up to 340mm width)
- paperweight 40 up to 300 g /m²
- folding of stapled sheets
- stageless adjustable production output up to 20.000DinA4-foldings / h
- Non-Stop-Function! Refilling during folding process due to friction feeder
