

FZM 340

Folding Machine

Highly productive folding machine for professional use.

The robust construction allows high quality processing of various materials as papers and plastic sheets in continuous operation.

A perfect folded product is guaranteed by comprehensive and dignified adjustment possibilities. Rebuilding for different materials, grammage and folding types is simple and easy and enables an efficient production even for small and medium jobs.

By the gentle friction feeding from below, material can be filled up continuously while the machine is operating.

Thereby the FZM 340 convinces with a maximum production output up to 20.000 DinA4-foldings per hour – even with large jobs.

- Robust and maintenance free, outstanding stability, made for continuous operation.
- 2 folding pockets, for all common kinds of folding
- Paper size up to DinA3+ (up to width of 340mm)
- Paper weight from 40 up to 300 g / m²
- Folding of stapled stacks possible
- Stageless adjustable production output up to 20.000DinA4-foldings / h
- Non-Stop-Function! Refilling during folding process due to friction feeder

FOLDING MACHINE FZM 340

Features and technical equipment

FZM 340

Continuous output	up to 20.000 sheets/h DIN A4
Paper size	up to DinA3+ (up to 340mm width)
Paper weight	40g up to 300g/m ² also cardboard, plastic sheets, ...
Paper feeding	friction feeder from below
Paper capacity	400 sheets refilled from below
Machine dimensions	3500 / 530 / 1100 mm
Machine weight	36 kg
Machine power	230V / 50Hz
Options	<ul style="list-style-type: none"> ▪ Noise insulation ▪ stand with / without rollers ▪ Tools for creasing at the outlet ▪ special dimensions and materials on request
